

OPTIMIZED FINANCIAL MANAGEMENT

- Keep track of costs

EG MainManager provides a comprehensive software solution that gives full control over costs and financial processes – regardless of whether you manage a single property or an extensive portfolio.

EG MainManager always gives you updated cost status for all assets. Our software allows you to track cost-related information at the component, portfolio or property group level. This includes:

- Budget
- Expenses
- Transactions
- Revenues
- Subjects
- Results
- Types
- Allocated cost
- Accounts
- Real price
- Cost centers
- Invoices

Keep track of your finances using EG MainManager's finance module. Create and synchronize account structures with financial dimensions for seamless data integration.

Get a full overview of budgets and costs across properties and departments. Keep an eye on expenses and expected cash flow needs by dividing budgets into months.

With EG MainManager, you can accurately track costs for work orders, buildings, rooms and more to stay within budget.

Our electronic invoice management and inventory management tool makes administration even more streamlined.

EG MainManager's financial management also offers:

Standardized reports

Easy access to information

Visual presentation of data and information

Filtering of data

Analytical tools

Categorization of objects, equipment and costs
