

ASSET MANAGEMENT

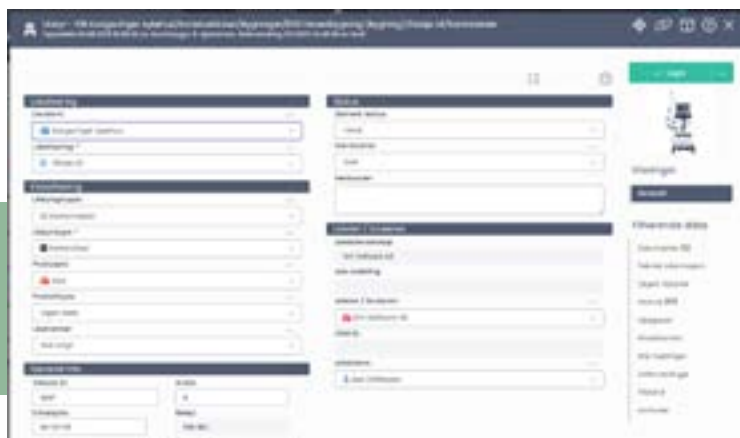

- Effective capital management for better financial overview

Effective management of your assets is essential to reduce costs and achieve an accurate overview of your financial investments. EG MainManager offers a comprehensive and flexible solution within Asset Management that allows you to register a wide range of assets. The module also provides access to history, condition, purchase planning and rental of equipment. This provides an accurate cost overview with depreciation.

Asset types:

- Office equipment
- Real estate equipment
- Art
- Vehicle
- Computers
- Telephones
- Other equipment

EG MainManager allows you to easily assign assets to employees and locations. Each asset has its own properties depending on the type. In addition, all assets can be equipped with barcodes or QR codes, making it possible to register tasks and create work orders, directly from your phone by scanning a code.

With Asset Management, you can easily find out where the equipment is located in the property portfolio and see which organization it belongs to.

Additional services

- Art objects
- Vehicles
- Telephones
- IT equipment
- Creation of inventory
- Standard API for equipment
