

# PORTALS

## - Specialized portals for better management

EG MainManager offers five specially designed portal solutions for one detailed administration of important topics within property management.

### Fire portal

- Monitor and administer fire prevention systems and premises
- Store and maintain important documents and contacts for the fire service
- Maintain a detailed record of fire prevention reports and work orders

### Accessibility portal

- Track and plan changes to building components to meet the needs of the disabled
- Manage plans and inspections related to accessibility

### Health and safety portal

- Handle collaboration contracts and risk areas for materials and equipment

- Keep track of instructions and information on health and safety legislation

### Environment portal

- Monitor environmental systems on the property
- Manage and follow an environmental plan
- Categorize and report waste generation
- Assess environmental impact and apply the results in action plans

### Portal for the preservation of historic buildings

- Identify and maintain parts of buildings worthy of preservation
- Handle conservation criteria and maintenance plans
- Automate information sharing with contractors when sending work orders
